

HAGAI MOZES

Software Developer

Tel Aviv, Israel | 052-695-8044 | hagimo@gmail.com

Software developer. Builds production-grade AI agents and tools.

EXPERIENCE

NVIDIA | Software Developer, Firmware Verification

2023 - Present

- Firmware verification engineer for Co-Packaged Optics (CPO), establishing a greenfield verification environment for a new technology stack.
- Won 2nd place in the NVIDIA Networking Hackathon.
- Initiated and developed AI agents and AI-assisted tooling for CPO engineering workflows, including CPO Monitor, adopted broadly by CPO engineers.
- Own multiple verification, monitoring, and debugging tools, including MM Validator, Module Monitor, and CPO Monitor.
- Built AI-enabled monitoring and debugging workflows that improved visibility into firmware behavior, module state, and validation failures.

Intel | SoC Physical Design Backend Developer, C2DG Core Group

2021 - 2023

- Worked in a full-chip integration group across front-end to back-end delivery, physical design, tool support, and flow development.
- Owned backend partition work across synthesis/signoff and supported tape-out readiness checks.
- Developed and ran automated central flows for Synopsys and Cadence signoff tools, including FlowTracer-based design execution.
- Supported formal-equivalence verification (FEV) full-chip runs and user support.
- Recognized by department management for closure-flow development and instructed new employees.

Office of the Prime Minister | Classified Role

2018 - 2020

EDUCATION

Tel Aviv University | B.Sc., Electrical Engineering & Computer Science

2019 - 2023

- Majors: computer communication (EE) and information security (CS).
- Programming tutor in Python, C, and Java; private tutor and mentor in university programs.
- Project experience included kernel programming, parallel programming, communication systems, and cybersecurity.

MILITARY & LEADERSHIP

IDF Armored Corps | Combat Officer, Deputy Company Commander

2014 - 2018

- Captain; led operational teams as deputy company commander and platoon commander, with a Colonel-level excellence certificate.
- Reserve duty as platoon commander.

SKILLS

Programming: Python, C, C++, Java, Tcl, Verilog

Tools & environments: Unix/Linux, Git, Cursor, Claude Code, Cadence, Synopsys, firmware verification and debugging tools

Domains: CPO, firmware verification, computer networking, information security, kernel programming, parallel programming, SoC physical design, signoff flows.

Languages: Hebrew native, English very good

ADDITIONAL HIGHLIGHTS

Amit Bar Ilan High School | Physics and Electronics; Bar Ilan University nanotechnology program.

2006 - 2012

First place in a national Arduino/GPS final-project competition; React Native volunteer development at Hagvurah Hackathon.
